Learning/Training Documents 700 CNC Technology

Module Overview

The Learning und Training Documents on CNC Technology 700-XXX with SinuTrain Operate V4.5 have a modular structure and cover the basics of “DIN program Guide”, “ShopTurn” and “ShopMill”. They are designed for CNC machine programming via SinuTrain.

The following overview provides you with a quick overview of the learning content of the entire learning- and training module.

700-010 – DIN programGuide Basics

In this module, you will learn the basics of the "OPERATE DIN programGUIDE programming" using two examples each for turning and milling.

700-020 – ShopTurn Basics

In this module, you will learn how you can easily go from a drawing to a finished workpiece with the help of the OPERATE machining plan sequential programming interface, ShopTurn.
