# What Information is Available About Licenses for WinCC (TIA Portal)?

WinCC (TIA Portal) & Operator Panels

FAQ • August 2015

# Service & Support

Answers for industry.

# **SIEMENS**

This entry originates from the Siemens Industry Online Support. The conditions of use specified there apply (<u>http://www.siemens.com/terms\_of\_use</u>).

Siemens offers products and solutions with industrial security functions which Security support the secure operation of plants, solutions, machines, devices and/or notes networks. They are important components in a comprehensive industrial security concept. The Siemens products and solutions continue to be developed under this aspect. Siemens recommends that you keep yourself regularly informed about product updates. For the safe operation of Siemens products and solutions it is necessary to take appropriate security measures (cell protection concept, for example) and to integrate each component in an overall industrial security concept which is state of the art. This should also cover the third-party products used. Additional information about Industrial Security is available here: http://www.siemens.com/industrialsecurity. In order to keep yourself informed about product updates, we recommend subscribing to our product-specific newsletter. Additional information about this is available at: http://support.industry.siemens.com/.

## Question

What information is available about licenses for WinCC (TIA Portal)?

#### Answer

Follow the instructions and notes listed in this document for a detailed answer to the above question.

## **1** General Information about Licenses

#### 1.1 License, Certificate of License and License Key

#### Below are explanations of the terms used.

#### License

A license is granted as the authorization to utilize products. A license consists of the **CoL** and the **License Key**, which represent the authorization for utilization.

• **CoL**- Certificate of License:

The CoL is a confirmation in writing (evidence) of the license. It documents the owner of the license in the legal sense and contains the license number for unique identification of the license.

• License Key

The License Key is the "technical representation" of the license ("electronic license stamp").

• Authorization

The Authorization is the predecessor of the License Key. Authorizations are **not** used any more in WinCC (TIA Portal). This is why the topic of "Authorization" will not be dealt with any further. Information about this is available in Entry-ID <u>27005215</u>

#### Note

You receive the license in paper form. The license authorizes you to install on a computer and use the version of WinCC (TIA Portal) purchased.

#### License Key

CoL

You receive the License Key on a separate, copy-protected USB stick.

#### 1.2 Why Do You Need Licenses?

You need a License Key in the following cases.

- To use the WinCC (TIA Portal) Engineering System
- To use the options of the WinCC (TIA Portal) Engineering System
- To use the WinCC (TIA Portal) Runtime
- For using options of WinCC (TIA Portal) Runtime on PC-based operator panels
- For using options on non-PC-based operator panels.

## 1.3 Available License Types

The WinCC (TIA Portal) Engineering System uses the following license types.

- Demo License
- Floating License
- Trial License
- Single License
- Upgrade License
- Power Pack
- Unlock Copy License (UCL)

#### Descriptions of the license types

#### **Demo License**

Utilization of the software with this license is limited to:

- The number of operating hours specified in the contract.
- The number of days from first use specified in the contract.
- Up to the expiry date specified in the contract.

#### **Floating License**

- Standard license for WinCC (TIA Portal) Engineering System. This license has a limited duration.
- You can use this license locally or through the network on any computer.
- Can be upgraded.

#### **Trial License**

- One-off, limited duration standard license.
- You can install and use this license locally on any computer.

#### Single License

- All licenses for WinCC (TIA Portal) Runtime and Runtime options are "Single Licenses". These licenses have a limited duration and can only be installed and used locally.
- Can be upgraded.

#### **Upgrade License**

With the Upgrade License you can do the following, for example:

- Switch from an old version to a new version (the requirement here is that the new version is already installed).
- Extend the quantity framework.

#### **Power Pack**

Power Pack permits you to make the following upgrades:

- From a smaller to a greater edition of WinCC Engineering System.
- To a Runtime system with a larger quantity framework.

For this a Power Pack includes a special license for switching to utilization of a higher level of WinCC.

#### Unlock Copy License (UCL)

- The UCL is an add-on based on standard products (with authorization) which replaces the authorization query of copy-protected programs with a customerspecific entry; the UCL therefore overrides the copy protection.
- The customer-specific entry is displayed in a splash screen each time the software is started and can also be read out from "Help/Info".
- The UCL is a customer-specific production.

## 1.4 Online Software Delivery

Online Software Delivery – by download to the automation software. The link below provides information on the topic of

"Downloading automation software and licenses".

http://www.siemens.com/tia-online-software-delivery

# 2 Options and Services in WinCC (TIA Portal)

Below is a list of options and services available for WinCC (TIA Portal). You need licenses to use these options and services.

This list is divided into the separate WinCC (TIA Portal) products.

#### WinCC Basic, Comfort and Advanced (Engineering System)

Table 2-1

No.	Option	WinCC Basic	WinCC Comfort	WinCC Advanced
1.				

#### WinCC operator panels and WinCC Runtime Advanced

5.	WinCC Data Monitor		Х
6.	SIMATIC Logon		Х
7.	WinCC Control Development		Х
8.	WinCC Redundancyy		Х

## 3 License Transfer

#### 3.1 Which Software is Needed?

The Automation License Manager (ALM) software is required for handling the License Keys.

The Automation License Manager is installed automatically by default with the software. Alternatively you can download the software in Entry-ID <u>114358</u>.

## 3.2 How Do You Transfer License Keys?

The Automation License Manager provides the following options for transferring License Keys:

- 1. Drag and drop.
- 2. Cut and paste.
- 3. Menu command "License Keys > Transfer".

**Note** Refer to Entry-ID <u>19109408</u> for which transfer and connection options are available for the separate operator panels.

## 3.3 Transfer License Keys to an Operator Panel

You can find out below how to transfer a license key from a PC to a TP1200 Comfort Panel, by way of example.

**Note** The operator panel used determines which connection types are supported.

Tab	le	3-1	
1 UD	5	0.1	

No.	Action	Screen
1.	Connect operator panel with the configuration computer Use a cable corresponding to the selected transfer to connect the operator panel to the configuration computer.	
	In this example it is a PROFIBUS cable.	
2.	Settings on the Operator Panel Set the relevant transfer type on the operator panel. This must match the settings in the ALM described below ( <u>Link</u> ). Then set the operator panel to Transfer	
	Mode.	
3.	Open the Automation License Manager (Windows XP Professional) Open the Automation License Manager by means of "Start > Programs > Siemens Automation > Automation License Manager".	
4.	<ul> <li>Connect the operator panel with the Automation License Manager</li> <li>Select the menu command "View &gt; Administration".</li> <li>Go to "Edit &gt; Connect Target System &gt; Connect Panel" to get to the "Connect Target System" menu.</li> </ul>	Extramation License Manager         File       Coll         Undo       Coll+2         Redo       Coll+2         Connect Computer       My Computer         New Folder       Connect Hold Series         Occonnect Larget system       Connect Hold Series         Out       Coll+2         Connect Hold Series       Coll+2         Out       Connect Hold Series         Out       Coll+2         Out       Coll+2         Sete       Coll+2         Reverse Selection       Autoristrungen (F:)         Delete Log       Select All         Connect Larget system       White Coll+2         Connect Larget system       White Coll+2

## 4 License Key (License) Backup

## 4.1 Which Software is Needed?

License Keys for software and operator panels can be backed up using the Automation License Manager (ALM). Follow the instructions in section 3.4 to backup the license keys of an operator panel.

## 4.2 When Do You Have to Back Up License Keys?

You must save the License Keys under the following circumstances:

- When you install a new operating system on a PC.
- Before you format the hard disk on a PC.
- Before you compress the hard disk on a PC.
- Before you restore the hard disk on a PC.
- When you start an optimization program that moves fixed blocks on a PC.
- Before you run a backup / restore procedure on an operator panel.
- Before you do a "Reset to factory settings" on an operator panel.

### 4.3 Backup and Restore on an Operator Panel

You do a backup or restore on an operator panel

- With ProSave
- Directly on the operator panel

With a backup you can do a complete save including licenses and use "Restore" to transfer them back again to the operator panel.

How to do a backup and restore is described in Entry-ID 28928853.

## 5 License Upgrades

If you need to upgrade a license key to use a new software version, then you must also use the **A**utomation **L**icense **M**anager (ALM).

Note

You cannot install upgrade license keys during Setup.

### 5.1 Requirements for an Upgrade

For upgrading a license key you need

- Of the software version to be upgraded:
  - The CoL (Certificate of License) and the License Key
- Of the target version (operator panel):
  - The CoL and the Upgrade License Key

**Note** Please note that both the "old" License Key as well as the upgrade itself must be stored on the hard disk of the computer on which the upgrade is to be made.

#### 5.2 Upgrading using the ALM

The procedure is described taking the example of an upgrade from WinCC V11 Comfort to WinCC V11 Advanced.

Note When you upgrade the license to a new version, the "old" license is overwritten.

Table 5-1

No.	Action	Screens
1.	Open the Automation License Manager (Windows XP Professional)	
	Open the Automation License Manager by means of "Start > Programs > Siemens Automation > Automation License Manager".	

No.	Action	Screens
2.	Storage location of the license         Select the menu command         "View > Administration".         Select the storage location in the navigation area where the license key to be upgraded is located.         In this case "C:\".         In the Object area on the right you get a display of the available licenses.         In this example:         WinCC Comfort         WinCC Advanced Power Pack         Note         The "WinCC Advanced Power Pack"	Image: Contraction License Manager         File Edit License Key Wew Help         Image: Contraction License Key         Image: Contraction License         Image: Contraction License         Image: Contraction License         Image: Contraction License         Image: Contrese         Image: Contraction License<
3.	<ul> <li>USB stick to the hard disk.</li> <li>Execute an upgrade</li> <li>In the Object area you select the license key that is to be upgraded. In this example the "WinCC Comfort" license.</li> <li>Execute the menu command "License Key &gt; Upgrade". The upgrade is now made.</li> </ul>	Waternation License Manager         File Edit Ucense Key View Help         Transfer         Synchronize License Requirements         Offline Transfer         See Keys - TIA-Portal (C:)         Recover         Recover         Recover         TICHMI WinCC Confract         10         TICHMI WinCC Advanced Powerpack 11.0
4.	The old License Key has now been replaced. Now only the new license key is visible. In this example: "WinCC Advanced Combo".	Katemation License Manager     File Edit License Kay Vew Heip     License Kay Vew Heip     Subscripter     Subscripter     Subscripter     Subscripter     Subscripter     Subscripter     Autoriserungen (F)     Autoriserungen (F)     Web License Key Download
	This completes the upgrade.	

## **Note** If there is only one option for upgrading, then the upgrade is made without any other displays or prompts.

If other upgrade options are found, the "License Key Upgrade" dialog opens. Select the upgrade to be made and click on the "Upgrade" button.

## 6 Tips and Tricks

#### 6.1 How Do You Repair a Defective License?

A license is deemed to be defective in the following cases:

- If the License Key can no longer be accessed in the storage location.
- If the License Key disappears when being transferred to the target drive.

You can use the Automation License Manager to repair a defective License Key. For this, use the "Restore" function or the "Restore Wizard" of the Automation License Manager.

You must get in touch with Customer Support if you want to restore a license. More information on this topic is available in Entry-ID <u>772175</u>.

#### 6.2 Why is a License Invalid After Changing Time Zones?

The installed license no longer functions if you switch from a time referred to a full hour to a time not referred to a full hour.

Example: You switch the time zone from GMT +3:00 hours to GMT +3:30 hours.

#### Remedy:

Uninstall the License Key with a time zone setting that was set before you installed the License Key and reinstall the License Key with the new time zone setting.

#### 6.3 Why are License Keys Not Recognized?

In this case, the reason might be an upgrade license. You might have installed the License Key, but have **not yet** made an upgrade. Help on this topic is available under "Upgrading Licenses".

# 6.4 Where is the "Old" License Key Located after an Upgrade?

If you want to upgrade an existing system, you can purchase an upgrade. When you make an upgrade, the existing License Keys are replaced by the new License Keys of the upgrade.

#### 6.5 How Do You Retrieve a Lost License Key?

You must make sure that you have the CoL in order to receive a new License Key. This is evidence that you are the owner of the license in the legal sense.

**Note** The Runtime software runs perfectly even if the license is missing or defective. The system displays a message at short intervals informing you of the unlicensed mode.

You must get in touch with Customer Support if you want to restore a license. More information on this topic is available in Entry-ID <u>772175</u>.

## 6.6 Can You Copy Licenses for Backup?

A License Key cannot be copied. The copy-protection procedure used prevents the copying of License Keys.
