Warning notice system

This manual contains notices you have to observe in order to ensure your personal safety, as well as to prevent damage to property. The notices referring to your personal safety are highlighted in the manual by a safety alert symbol, notices referring only to property damage have no safety alert symbol. These notices shown below are graded according to the degree of danger.

**DANGER**
indicates that death or severe personal injury will result if proper precautions are not taken.

**WARNING**
indicates that death or severe personal injury may result if proper precautions are not taken.

**CAUTION**
with a safety alert symbol, indicates that minor personal injury can result if proper precautions are not taken.

**CAUTION**
without a safety alert symbol, indicates that property damage can result if proper precautions are not taken.

**NOTICE**
indicates that an unintended result or situation can occur if the relevant information is not taken into account.

If more than one degree of danger is present, the warning notice representing the highest degree of danger will be used. A notice warning of injury to persons with a safety alert symbol may also include a warning relating to property damage.

Qualified Personnel

The product/system described in this documentation may be operated only by personnel qualified for the specific task in accordance with the relevant documentation, in particular its warning notices and safety instructions. Qualified personnel are those who, based on their training and experience, are capable of identifying risks and avoiding potential hazards when working with these products/systems.

Proper use of Siemens products

Note the following:

**WARNING**
Siemens products may only be used for the applications described in the catalog and in the relevant technical documentation. If products and components from other manufacturers are used, these must be recommended or approved by Siemens. Proper transport, storage, installation, assembly, commissioning, operation and maintenance are required to ensure that the products operate safely and without any problems. The permissible ambient conditions must be complied with. The information in the relevant documentation must be observed.

Trademarks

All names identified by ® are registered trademarks of Siemens AG. The remaining trademarks in this publication may be trademarks whose use by third parties for their own purposes could violate the rights of the owner.

Disclaimer of Liability

We have reviewed the contents of this publication to ensure consistency with the hardware and software described. Since variance cannot be precluded entirely, we cannot guarantee full consistency. However, the information in this publication is reviewed regularly and any necessary corrections are included in subsequent editions.
Preface

SINUMERIK documentation

The SINUMERIK documentation is organized in the following categories:

- General documentation
- User documentation
- Manufacturer/service documentation

Additional information

You can find information on the following topics at www.siemens.com/motioncontrol/docu:

- Ordering documentation/overview of documentation
- Additional links to download documents
- Using documentation online (find and search in manuals/information)

Please send any questions about the technical documentation (e.g. suggestions for improvement, corrections) to the following address:
docu.motioncontrol@siemens.com

My Documentation Manager (MDM)

Under the following link you will find information to individually compile OEM-specific machine documentation based on the Siemens content:

www.siemens.com/mdm

Training

For information about the range of training courses, refer under:

- www.siemens.com/sitrain
  SITRAIN - Siemens training for products, systems and solutions in automation technology

  SinuTrain - training software for SINUMERIK

FAQs

SINUMERIK

You can find information on SINUMERIK under the following link:
www.siemens.com/sinumerik

Target group

The operating manual is aimed at all machine tool users. The document describes all the facts the user needs to know.

Benefits

The operating manual allows the target group to get familiar with the software user interface. Based on the manual, the target group is capable of responding to problems and to take corrective action.

Standard scope

This documentation describes the functionality of the standard scope. Extensions or changes made by the machine manufacturer are documented by the machine manufacturer.

Other functions not described in this documentation might be executable in the control. This does not, however, represent an obligation to supply such functions with a new controller or when servicing.

Furthermore, for the sake of clarity, this documentation does not contain all detailed information about all types of the product and cannot cover every conceivable case of installation, operation or maintenance.

Technical Support

You will find telephone numbers for other countries for technical support in the Internet under http://www.siemens.com/automation/service&support

Introduction

1.1 Product Overview

Product Overview

DNC (Direct Numeric Control) is a function block of the Motion Control Information System (MCIS) and is used to integrate CNC and machine tools into the production system.

DNC is an NC program management and supply system for CNC controls for archiving and transferring NC programs.

From MCIS DNC V2.4 and higher it is now also possible to connect controls equipped with SINUMERIK Operate to a DNC server.

1.2 Calling DNC

Precondition

In order to make use of DNC, various basic functions of the ePS Network Services are used.

The necessary users have to be registered to link machine and server.

You can find additional information in the "ePS Network Services Function Manual".

Procedure

1. The control system has booted and the operating areas are displayed.
2. Select the "Program manager" operating area.
3. Press the "DNC" softkey.

The "DNC" window is opened and displays an overview of the NC program data.
Introduction

1.2 Calling DNC
Overview of the program data

An overview of the plant or system configuration is emulated in the "DNC" window.

Note
You can individually configure the sequence and selection of the columns to be displayed on the DNC server.

The system structure together with the directories is displayed in the left-hand window area. The contents of the directories are displayed in the right-hand window area.

<table>

</tbody>
</table>

Manage file system

The following functions are available for you to manage data:

- Switching filter on/off (Page 11)
- Transferring NC programs between the source and target.
- Selecting, copying, inserting directories.
  See chapter: Managing program data (Page 27)
- Updating the directory structure.
  See Chapter: Managing program data (Page 27)
- Sorting NC programs.
  See Chapter: Sorting NC programs (Page 12)
- Displaying the program content in the preview window.
  See Chapter: Preview (Page 14)
• Searching for specific files.
  See Chapter: Search function (Page 14)

• Creating filters.
  See Chapter: Filter settings (Page 15)

• Displaying data activities using a logbook.
  See Chapter: Display logbook (Page 21)

• Displaying management properties.
  See Chapter: Showing properties (Page 22)

• Deleting data.
  See Chapter: Managing program data (Page 27)

Figure 2-1   DNC overview
2.1 Switching filter on/off

You have the option of influencing the program list display by applying filter conditions therefore restricting the selection of visible directories/programs.

Precondition

Filter settings have already been defined.

See also:

- Filter settings (Page 15)
- Save filter (Page 18)
- Edit filters (Page 19)
- Setting a classic filter (Page 20)
2.2 Sorting NC programs

You have the option to display the NC programs sorted individually. You can define the criteria of the sort order via the user interface.

Criteria

- You can define up to three sort criteria.
- The criteria are selected via a drop-down list box. The drop-down lists include the column designations of the NC program list.
- The priority of the sort order is from the upper, to the medium and the bottom criterion.
- You can select via an option field whether the sorting is to be executed in ascending or descending order.
2.2 Sorting NC programs

Procedure

1. Position the cursor on the required directory of the NC programs.
2. Press the ">>" softkey.
   Additional softkeys are displayed on the vertical bar.
3. Press the "Sort" softkey.
   The "Sort settings" window opens.
4. Select the desired sort criteria according to which you wish to display the NC programs.
5. Press the "OK" softkey.
   The programs are displayed and sorted according to the specified criteria.
   - OR -
   Press the "Cancel" softkey if you wish to make no sorting. The window is closed.
2.3 Preview

You have the option of displaying a preview of the program content.

Procedure

1. Place the cursor on the desired program.
2. Press the ">>" softkey.
   Additional softkeys are displayed on the vertical bar.
3. Press the "Preview window" softkey.
   The "Preview" area is displayed in the lower window together with the file content.
4. Press the "Preview window" softkey again to close the window area.

See also
Overview of the program data (Page 9)

2.4 Search function

You have the option for searching for specific entries using the search function. The search function is a partial text search and is executed across all columns.

Procedure

1. Press the "Search" softkey.
   The "Search for" window appears.
2. Enter the term that you're looking for in the "Search text" entry field.
   - The text can be up to 256 characters long.
   - Use the asterisk ("**") as wildcard for any character string.
   - Use the question mark ("?") as wildcard for one character.
   - Activate the check box "same word", to search precisely for this term that has been entered.
3. Press the "OK" softkey to start the search.
The search starts from the current cursor position. The next hit is the new cursor position. This means that the search can be continued from the actual position - and if required can also be started from the beginning again.
- OR -
Press the "Cancel" softkey to stop the search.

See also
Overview of the program data (Page 9)

2.5 Configuring filters

2.5.1 Filter settings
You can influence the program list display using filter conditions and therefore restrict the selection of visible directories/programs.
You have the option of using each column in the displayed program list as filter criterion.
The following options are offered depending on column type:
- Selecting or deselecting using a checkbox
- Detailed information

Filter processing
Save filter (Page 18)
Edit filters (Page 19)
Setting a classic filter (Page 20)
## Filter criteria

<table>
<thead>
<tr>
<th>Filter criterion</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program name</td>
<td>Name of the program with a maximum of 255 characters.</td>
</tr>
</tbody>
</table>
| Program type     | The following program types are available for selection:  
|                  | • MPF for main programs  
|                  | • SPF for subprograms  
|                  | • TXT, PDF, … for text files  
|                  | • JPG, PNG; … for graphic files  
|                  | • Freely editable data that you can save on the server in the program type table. |
| Release ID       | Selection of:  
|                  | • No  
|                  | • Yes  
|                  | The release identifier acts only on NC programs for execution in the NC.  
|                  | Programs with the same name can only be allocated a "YES" release once. |
| Trial cut ID     | Selection of:  
|                  | • No  
|                  | • Yes  
|                  | The trial cut ID acts only on NC programs for execution in the NC. |
| Modification date| Limit the change date of NC data by entering "from" / "to".  
|                  | Specify the date as a contiguous number:  
|                  | • Year: four-digit  
|                  | • Month: two-digit  
|                  | • Day: two-digit |
| Length           | Limit the length of NC data in bytes by entering "from" / "to". |
2.5 Configuring filters

### 2.5.2 Activate filter

**Procedure**

1. The "DNC" window is opened.
2. If you press the ">>" softkey, further softkeys are displayed on the vertical bar.
3. Press the "Filter >" softkey. The "Saved filters" window is opened.
4. Already defined filter settings can be selected via the selection field. In addition to the filter designation, the associated comments are also displayed.
2.5.3  **Save filter**

You can save any individually set filter.

**Save filter**

<table>
<thead>
<tr>
<th>Display</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Filter name</td>
<td>Any filter name with a maximum 40 characters.</td>
</tr>
<tr>
<td>Comment</td>
<td>Freely selectable text as a comment to a filter setting.</td>
</tr>
<tr>
<td></td>
<td>See Chapter: Entering a comment (Page 24) Enter comment</td>
</tr>
<tr>
<td>Application</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Global Filter can be used in the entire DNC system.</td>
</tr>
<tr>
<td></td>
<td>Local A filter can only be used on the machine for which it was originally created.</td>
</tr>
<tr>
<td></td>
<td>User defined A filter can only be used by the user who created it.</td>
</tr>
</tbody>
</table>

**Procedure**

1. You have selected the filter criteria and wish to save these settings.
2. Press the "Save filter" softkey.
   The "Save filter" window is opened.
3. Enter the filter name into the entry field "Filter name".
   You obtain a confirmation prompt if you use an existing name.
   Confirm the query in order to overwrite the name.
   - OR -
   Cancel the action in order to change the name.
   Enter the new name and optionally a comment in the entry field.
4. Press the "OK" softkey to save the filter.
   - OR -
   Press the "Cancel" softkey to reject the settings.
2.5 Configuring filters

2.5.4 Edit filters

You have the option of recalling already saved filter settings in order to use them for filtering or to edit the filter settings.

Select filter

1. The "Saved filters" window is opened.
2. In the selection box, you can display the existing filters in alphabetical order.
3. Select the desired filter using the cursor and click the "OK" softkey. The filter settings are displayed.

Saving the filter under a different name

1. If you changed the settings of a filter that has been saved, then save the filter under a different name.
   Press the "Save as" softkey. The "Save filter as" window is opened.

2. Enter the new filter name and optionally a new comment.
3. Press the "OK" softkey to confirm your entry. The filter settings are applied and activated as a temporary filter.

Reset filter

1. Press the softkey "Reset filter", to reset the filter criteria that were individually set.
   If you saved the filter that was reset under the same name, then the conditions are retained.
### Delete filter

1. Use the cursor to select the filter to be deleted in the filter list.
2. Press the "Delete filter" softkey.
   You obtain a confirmation prompt as to whether the filter should be deleted.
3. Press the "OK" softkey.
   The filter is removed from the list.
   - OR -
   Press the "Cancel" softkey to cancel the delete operation.

### 2.5.5 Setting a classic filter

In addition to the option of directly defining the filter at the control using SINUMERIK Operate, there are filter links, which are created at the DNC server. The display of such filter configurations are the classic filters. The variables are only displayed, but cannot be modified.

For a detailed description of the filters created on the DNC server, please refer to the following description:

### Reference

Function Manual NC Program Management DNC; view filter

### Use

<table>
<thead>
<tr>
<th>Column</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Variable</td>
<td>Individually set-up variable.</td>
</tr>
<tr>
<td>Operator</td>
<td>Specifies how the variable is linked with the value to the filter condition.</td>
</tr>
<tr>
<td>Value</td>
<td>Specifies what the variable is processed with as filter condition.</td>
</tr>
</tbody>
</table>

### Classic filter upload

1. The "Saved filters" window is opened.
   In the selection box, you can select the desired filter.
   The saved filters are displayed in alphabetical order.
2. Select the required filters, e.g. "classic1".
   The associated comments are displayed next to the filter designation.
3. Press the "OK" softkey.
The variables that have been created are displayed.

4. Place a checkmark in the checkbox of the variables to activate the filter condition.

2.6 Display logbook

Use

All NC data activities are chronologically recorded in the log book. An identifier specifies whether an action has been automatically or manually executed.

The action that was performed is listed in a table together with the time stamp, the name of the NC data and the operator station.

As an option, the user that executed the action can also be recorded.

The archiving time for the data that has been recorded can be permanently set, in order, when required, to fulfill the obligation of guaranteeing proof over a lifetime (traceability).

Procedure

1. Select the NC file.
2. Press the ">>" softkey.
The expanded menu is displayed.
3. Press the "Logbook" softkey.
The "Logbook" window opens and displays all of the information in conjunction with how DNC handled NC program data at the machine.
Overview of the program data

2.7 File properties

Example

<table>
<thead>
<tr>
<th>Type</th>
<th>Date</th>
<th>Number</th>
<th>Message text</th>
</tr>
</thead>
<tbody>
<tr>
<td>M</td>
<td>17.09.2010 14:49:54</td>
<td>0</td>
<td>KHBTEST.MPF downloaded</td>
</tr>
<tr>
<td>M</td>
<td>16.09.2010 13:39:45</td>
<td>0</td>
<td>MYTEST043.MPF downloaded</td>
</tr>
<tr>
<td>M</td>
<td>16.09.2010 13:38:53</td>
<td>0</td>
<td>FACE_MILLING_3.MPF downloaded</td>
</tr>
<tr>
<td>M</td>
<td>15.09.2010 08:19:47</td>
<td>0</td>
<td>HGFGH.SPF uploaded</td>
</tr>
<tr>
<td>M</td>
<td>14.09.2010 15:56:59</td>
<td>0</td>
<td>test.MPF uploaded</td>

<tr>
<td>E</td>
<td>14.09.2010 15:56:58</td>
<td>0</td>
<td>Invalid uploadtarget-NodeID: 7 changed to: 4</td>
</tr>
</tbody>
</table>

Type M indicates that the activity was manually executed with the NC data.
Type E indicates that the activity was automatically executed with the NC data.

Overview of the program data

2.7 File properties

2.7.1 Showing properties

Use

You can display additional information for a program data file selected from the list. In addition to the standard details, such as the name and type, all management data, such as creator, creation date and the date of the last change can be displayed.

With the exception of setting and resetting the trial cut and release ID, the data cannot be changed.

Note

You can individually configure the sequence and selection of the columns to be displayed on the DNC server.

Procedure

1. Position the cursor on the file or directory whose properties you wish to display.
2. Press the ">>" and "Properties" softkeys.

The "DNC properties" window opens and displays the stored properties.

See also

- Display attachments (Page 24)
- Entering a comment (Page 24)
- Displaying a graphic (Page 26)
2.7.2 Entering a comment

For every file saved in the DNC program system, you can enter any comment as remark.

Precondition

To enter a comment, you need the corresponding access rights. The access rights are defined on the DNC server.

Procedure

1. Select the file.
   Press the softkey "comment", in order to open the input window.
   Enter a unique text.
2. Press the "OK" softkey to save the comment together with the program data.
   The comment window is closed again.
   - OR -
   Press the "Cancel" softkey to close the input window without saving.

See also

Showing properties (Page 22)

2.7.3 Display attachments

For each file to be stored in the DNC program system, additional files can be assigned as so-called "Attachments".

You can view the files if an appropriate editor has been implemented.

Following attachments are possible:

- Text files
- PDF files
- Graphics
- SVG
2.7 File properties

<table>

<tr>
<td>Date</td>
<td>Time stamp with the date and time</td>
</tr>
</tbody>
</table>

**Procedure**

1. Place the cursor on the desired program. The "Attachments>" softkey can be selected if additional files have been assigned to the program file.

2. Press the "Attachments>" softkey. A window is opened in which the stored files are listed. In addition, a new vertical softkey bar is displayed. The following softkeys can only be selected if the appropriate file is selected.

3. Press the softkey "Display text file" in order to view the text file.

2.7.4 Displaying a graphic

You have the option of displaying graphics on the user interface.

Procedure

1. Position the cursor on the graphic file. The system detects the graphic format and the softkey "Display graphic" can be selected.
2. Press the softkey "Display graphic", to open the file and display it.
3. Press the softkey again to close the graphic.
   Note: You can only select and open one file at a time!

Showing properties (Page 22)
Managing program data

Overview

You can access programs from DNC in the operating area "Program manager", "DNC" from the user interface of the SINUMERIK Operate.

A transparent directory structure helps you to simply manage files and programs. You can select and copy data and insert this data into other directories. Programs that you no longer require can be deleted to release storage space that they are taking up for other data.

Possible storage locations are:
- NC
- Local drive
- Network drive
- USB drive
- DNC server

Precondition

- You need the corresponding access rights if you modify, copy and delete files: The access rights are defined on the DNC server.
- When assigning a new file name, ensure that only files with a maximum name length of 24 characters can be managed.

Procedure

1. Select the "Program Manager" operating area.
2. Press the "DNC" softkey.
3. Select the desired NC data. Single and multiple selection is possible.
4. Press the "Select" softkey.
5. Press the "Copy" softkey in order to copy the data to the buffer memory.
6. Then select the target directory and press the "Paste" softkey. An appropriate note is displayed if this directory already includes a directory/program with the same name. You are requested to assign a new name, otherwise the directory/program is assigned a name by the system.

7. Delete programs or directories that you are no longer using in order to keep your data management transparent and clear. Select the data and press the "Delete" softkey. Please note when you delete a directory, that all programs, as well as subdirectories contained in this directory, are also deleted!

8. Changes to the directory contents are not automatically updated. Press the softkey "Update", to reestablish the window view.

Appendix A

A.1 List of abbreviations
Index

C
Calling DNC, 7, 17

D
Defining the sorting, 12
Displaying a graphic, 26
Displaying an attachment, 25

E
Entering a comment, 24

F
Filter
  activate/deactivate, 12
  Activating the settings, 17
  Criterion, 15
  Deleting, 20
  Reset, 19
  Save, 18
  Save as, 19

L
Logbook, 21

P
Preview, 14

S
Search function, 14
Showing properties, 23
