Overview

The TS-3 temperature sensor provides an input signal for temperature compensation of specific Siemens ultrasonic level controllers.

Benefits

- Chemically resistant ETFE enclosure
- Fast response time
- Approved for use in potentially explosive atmospheres

Application

Temperature compensation is essential in applications where temperature variations of the sound medium are expected.

By installing the temperature sensor close to the sound path of the associated ultrasonic transducer, a signal representative of the sound medium's ambient temperature is obtained. The temperature sensor should not be mounted in direct sunlight.

The TS-3 is used in conjunction with ultrasonic transducers that do not have an integral temperature sensor. It is also recommended in cases where the integral temperature sensor of the transducer cannot be used.

The following conditions are typical for use of the TS-3 sensor: where a fast reaction to temperature variations is required, where a flanged ultrasonic transducer is used, or where high temperatures are encountered.

The TS-3 is not compatible with devices using the TS-2 or LTS-1 temperature sensors. Refer to the associated controller manual for more details.

- Key Applications: for use in applications where temperature sensor measurement from transducer does not accurately represent vessel temperature. Used for applications requiring quick temperature response (open channel monitoring).
Level Measurement
Continuous level measurement

TS-3 temperature sensor

Technical specifications

Mode of operation
Measuring principle: Temperature sensor

Input
Measuring range: -40 °C ... +100 °C (-40 °F ... +212 °F)

Output
Response time:
- Forced circulation (temperature variation: 63 %): 55 s
- Flange, forced circulation: 90 s
- Natural convection: 150 s

Rated operating conditions
Installation instructions: Mounted indoors/outdoors, but not exposed to direct sunlight
Pressure: Max. 4 bar (60 psi/400 kPa)

Design
Material (enclosure): ETFE

Cable connection: 2-core, 0.5 mm² (20 AWG), shielded, silicone sheath

Process connection: ¾" NPT [(Taper), ANSI/ASME B1.20.1] / R ¾" [(BSPT), EN 10226], totally encapsulated

Certificates and approvals: CE, IEC Ex, FM, CSA, ATEX

1) ETFE is a fluoropolymer inert to most chemicals. For exposure to specific environments, check the chemical compatibility charts before installing the TS-3 in your application.
