Cabling technology for communication networks in industry

A faultless on-site connection in 60 seconds with FastConnect

Problems often occur on-site when laying the cabling for industrial plants: when stripping the cable, assembling the plug-in connector, or connecting the cores.

The FastConnect (FC) quick assembly system from Siemens is the right system for:

- Optimally matched components for configuration of industry standard and robust network structures within the shortest possible time and without specialist knowledge
- Minimal amount of time for connecting terminal devices
- Avoidance of installation errors
- Simple on-site assembly
- Reduction of overall costs throughout the entire system lifetime

FastConnect includes cables, connectors and tools, and can be used for Industrial Ethernet, PROFINET, EtherNet/IP as well as for PROFIBUS.

With its optimally matched components, SIMATIC NET cables enable the installation of high-performance industrial network structures.

- Minimal installation time
- Easy stripping of outer sheath and braided shield in one step
- Simple connection system for Industrial Ethernet FastConnect cables
- Easy assembly thanks to preset FastConnect stripping tool
- Reliable shield contacting and strain relief
- M12 and RJ45 connection system for Industrial Ethernet, PROFINET, EtherNet/IP and PROFIBUS

Your benefits with FastConnect

With the FastConnect (FC) system for Industrial Ethernet, structured cabling from the office environment becomes industry-compliant:

- Coordinated system of FC plug-in connectors and an extensive FC cable spectrum for a wide variety of requirements in the industrial sector and energy automation
- UL approvals for Industrial Ethernet, PROFINET, EtherNet/IP, and PROFIBUS enable worldwide use
- Avoidance of errors thanks to color coding, preset tools, and defined materials
- Reliable shield contacting and strain relief as well as efficient EMC shielding for copper cabling
- Use of standard-compliant connection systems for Industrial Ethernet, PROFINET, EtherNet/IP, and PROFIBUS
- Fulfills environmental requirements in accordance with IEC 61850-3 and EN 45545 fire protection standard in rail vehicles

FastConnect for Industrial Ethernet/PROFINET

Quick connection of FastConnect (FC) RJ45 plug-in connectors 2 x 2 and 4 x 2

The Industrial Ethernet RJ45 plug-in connector for easy on-site assembly of 4- and 8-wire twisted pair FC installation cables (up to 10 Gbps) using the Industrial Ethernet stripping tool

Prefabricated with RJ45 plug-in connector 2 x 2

Cabling technology for communication networks in industry

FastConnect for Industrial Ethernet/PROFINET: Prefabricated with RJ45 plug-in connector 4 x 2

Measure the cable end

Cut the cable end with the FastConnect stripping tool

Remove the outer sheath and expose the braided shield

Remove the interior support cross

Unravel and smooth out the twisted wires

Insert the wires into the plug according to color code and pull them out the opposite side

Press the plug casing to close it

Fasten the casing using a screwdriver

Remove protruding wires

FastConnect (FC) M12 plug-in connector 2 x 2 and 4 x 2

Industrial Ethernet M12 plug-in connector for easy on-site assembly with degree of protection IP65/67 for connecting 4- and 8-wire twisted pair FC installation cables (up to 10 Gbps) using the Industrial Ethernet stripping tool

Prefabricated with M12 plug-in connector 2 x 2

Prefabricated with M12 plug-in connector 4 x 2

FastConnect (FC) LC and ST/BFOC plug-in connector

The Industrial Ethernet FastConnect LC and ST/BFOC plug-in connectors for easy on-site assembly of FastConnect glass fiber optic cables (62.5/200/230 μm multimode fibers) for lengths up to 3 km (100/1000 Mbps Industrial Ethernet/PROFIBUS) using the FastConnect FO termination kit

Prefabricated FastConnect for glass fiber optic cables

Cabling technology for communication networks in industry

FastConnect for PROFIBUS

Fast connection of FastConnect (FC) sub-D plug-in connectors

The PROFIBUS (FC) sub-D plug-in connector for easy on-site assembly of 2-wire FC installation cables (up to 12 Mbps) using the PROFIBUS stripping tool

Stripping and assembly using insulation displacement system

FastConnect (FC) M12 plug-in connector

The PROFIBUS (FC) M12 plug-in connector for easy on-site assembly of 2-wire FC installation cables (up to 12 Mbps) using the PROFIBUS stripping tool

Stripping and assembly with M12 plug-in connector

Cabling technology for communication networks in industry

Security information

Siemens provides products and solutions with industrial security functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.

For additional information on industrial security measures that may be implemented, please visit <https://www.siemens.com/industrialsecurity>.

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Security RSS Feed under <https://www.siemens.com/industrialsecurity>.
