 6.1 Errors eliminated 5

1. General

This document includes the changes and issues that were resolved in identSNAPSHOT Application sorted by release version.

2. identSNAPSHOT Application V2.3: Go-Live on 08/14/2019

2.1 Changes made

- Feature 178: Import of customer addresses from excel file, generated by GSP.
- Feature 204: Show "Main Product Group" read from GSP-File.

2.2 Errors eliminated

- Bug fix: Login with PKI under Windows 10 leads to application deadlock.
- BUG 267: KPI logs are not registered anymore.
- BUG 240: identSNAPSHOT supported Languages (de/en/es/fr/it/pt/ko/chs/cht)
- BUG 187: Content of the address combo box does not change after selecting an address from the popup list.
- BUG 117: Incorrect used PridaNet version for generating Upload certificates (see foot note)
- BUG 214: Link to WebSSO-Login page must be updated
- BUG 653: Update Country List

3. identSNAPSHOT Application V2.0 HF1: Go-Live on 10/10/2018

3.1 Changes made

- Show Information about 3rd Party Software components used and delivered in the identSNAPSHOT application.
- Translation of some language texts

3.2 Errors eliminated

- Bug fix: Updater does not work!
During the Update in case of new version, the updater can not unzip the downloaded version successfully.
An error occurs: The Zip-File cannot be unzipped, because dlls are still in use by other process!

4. identSNAPSHOT Application V2.0: Go-Live on 08/09/2018

4.1 Changes made

- Platform migration to new Provider AWS (Amazon Web Services)

5. identSNAPSHOT Application V1.5 SP5 HF2: Go-Live on 07/19/2018

5.1 Changes made

- Small updates: Siemens logo, Copyright year, ...

5.2 Errors eliminated

- Bug fix: "Check connections" is not working
No reaction if the menu item "Check Connection" is clicked.
- Bug fix: Cannot create logbook
If you try to create a logbook by using Menu item "Create Logbook", a corrupt pdf-file will be created in the target directory, that cannot be opened.

6. identSNAPSHOT Application V1.5 SP5 HF1: Go-Live on 07/05/2018

6.1 Errors eliminated

- **Security patch:**
Due to a security issue we had to replace a 3rd party component, which was used for opening and reading .zip archives within identSNAPSHOT.
Exploiting this vulnerability could have caused unauthorized replacement of files on your system.
We advise you to install this update as soon as possible in order to close the vulnerability.
- **Bug fix: Address country is not updated!**
By changing the language, the country field in all addresses (Manufacturer, Dealer and End user) stays in the old used language.
- **Bug fix: Enable editing the fields for Siemens employees (internal use)**
Both fields "Manufacturer's machine number (Equipment Number)" and "Machine type (Equipment name)" should be editable for Siemens employees.
- **Bug fix: Info Message "Could not write file" should not be shown after displaying the concrete error message.**
You create a new machine and save it. Then you change the "Manufacturer's machine number" to create a similar machine, you'll get an info message, whether you want to create a new machine. If you answer with clicking the "No"-button, you'll get the info message "Could not write file". This latest info message should not be shown.
- **Bug fix: You load a machine file with an invalid dealer address (e.g. only the country is set).** If you try to upload this machine file, you get an error message "A mandatory field of an address has not been entered in full, please complete the address and confirm with Apply changes!" without mentioning, which address is invalid (Dealer, Manufacturer,...).
An Information about the affected address, e.g. Dealer, should be added to the message text.
