Overview

This driver software enables WinAC to communicate via the integrated RS232 interfaces of the PC.

Functionality

Function blocks, such as P_SEND to send data and P_RCV to receive data, are available to the user. The FB interface is compatible to CP340-RS232-C and supports ASCII communication.

Examples of use

Usage of the integrated serial interfaces of a PC, allows interesting cost-effective solutions. For example the control of periphery via serial interface (scanner or scales).

Scope of supply

- Driver (.dll)
- Step7 demo program (FBs/FCs)
- Documentation
