

Level Measurement

Continuous level measurement - Capacitance transmitters

SITRANS LC500

Overview

SITRANS LC500 is an inverse frequency shift capacitance level or interface transmitter for extreme and critical process conditions, such as oil and liquefied natural gas (LNG) as well as toxic and aggressive chemicals and vapors.

Benefits

- Active-Shield technology so measurement is unaffected by material buildup in active shield section
- Simple push-button calibration and integrated local display
- Inverse frequency approach provides high resolution
- 2-wire loop powered 4 to 20/20 to 4 mA measurement signal
- Pre-detection alarm and full function diagnostics
- High temperature and pressure resistant (optional)
- Full-function diagnostics comply with NAMUR NE 43
- Easy calibration locally or via HART (using SIMATIC PDM software)

Application

SITRANS LC500's advanced electronics provide one-step, push-button calibration and local display for easy on-site installation and setup.

The unique mechanical probe design coupled with a high performance transmitter gives superior performance in toxic and aggressive chemicals, acids, caustics, adhesives, and in viscous conductive and non-conductive materials.

The SMART 2-wire transmitter has HART communications for remote commissioning and inspection.

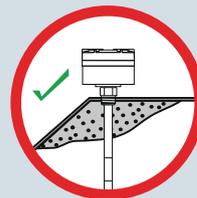

- Key Applications: oil/water or foam/liquid interface measurement in separators or coalescers, cryogenic applications including CO₂ and liquefied natural gas (LNG), distillation/regeneration tanks with high temperatures

Probe Applications

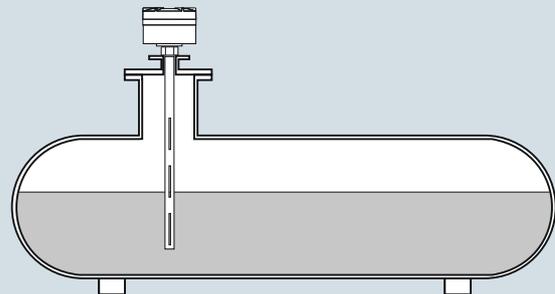

Rod version	Conductive liquids, slurries or solids
Rod version with stilling well	<ul style="list-style-type: none"> • Conductive liquids or slurries in non-conductive tanks • Non-conductive liquids in non-conductive tanks • Tanks with agitation or turbulent liquids • Liquids with a dielectric constant below 2 • Non-linear tanks, such as parabolic or spherical tanks • Interface measurements
Cable version	Non-conductive solids or liquids
PFA coated cable version	Conductive or sticky liquids, slurries, or solids
Extended cable with rod version	Long range conductive liquids, slurries or solids when level or interface measurements are required in the low area of the bin or tank

Configuration

Installation

Build up of material or condensation in active shield area does not affect switch operation.

Mounting on non-linear vessels in non-conductive fluids using stilling well.

SITRANS LC500 installation, dimensions in mm (inch)

Dimensional drawings

Cable version, non-insulated welded flange (7ML5513)

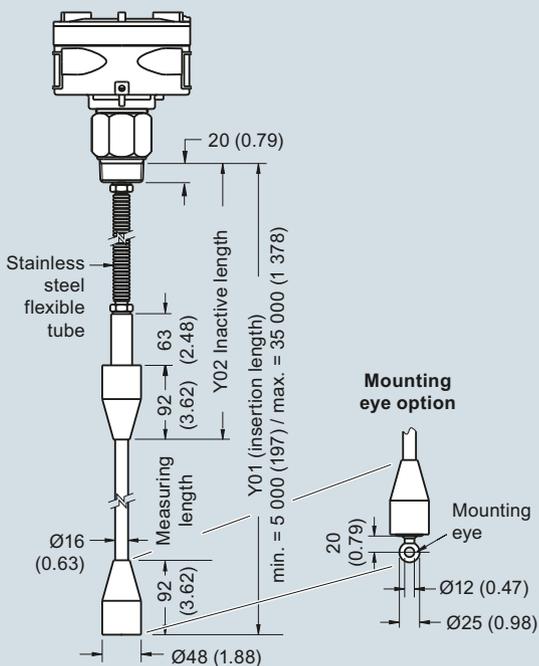

Cable version, insulated welded flange (7ML5513)

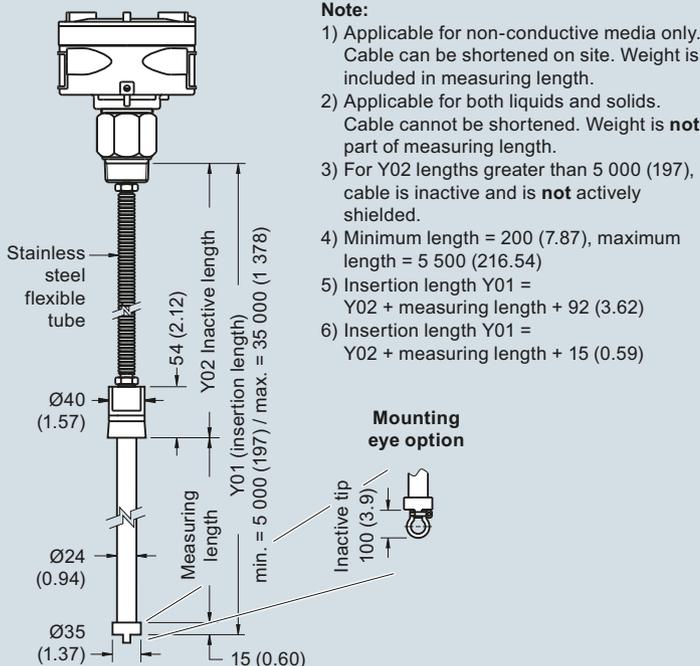

Option for mounting eye only available for PFA insulated cable

Extended cable version with rod sensor welded flange (7ML5523)

Extended cable version with rod sensor welded flange (7ML5523)

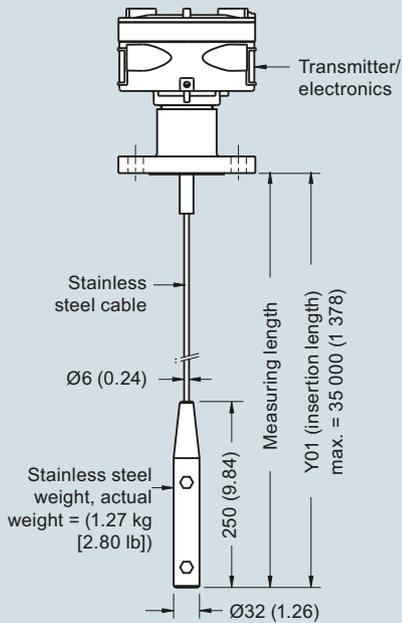

Note:

- 1) Applicable for non-conductive media only. Cable can be shortened on site. Weight is included in measuring length.
- 2) Applicable for both liquids and solids. Cable cannot be shortened. Weight is **not** part of measuring length.
- 3) For Y02 lengths greater than 5 000 (197), cable is inactive and is **not** actively shielded.
- 4) Minimum length = 200 (7.87), maximum length = 5 500 (216.54)
- 5) Insertion length Y01 = Y02 + measuring length + 92 (3.62)
- 6) Insertion length Y01 = Y02 + measuring length + 15 (0.59)

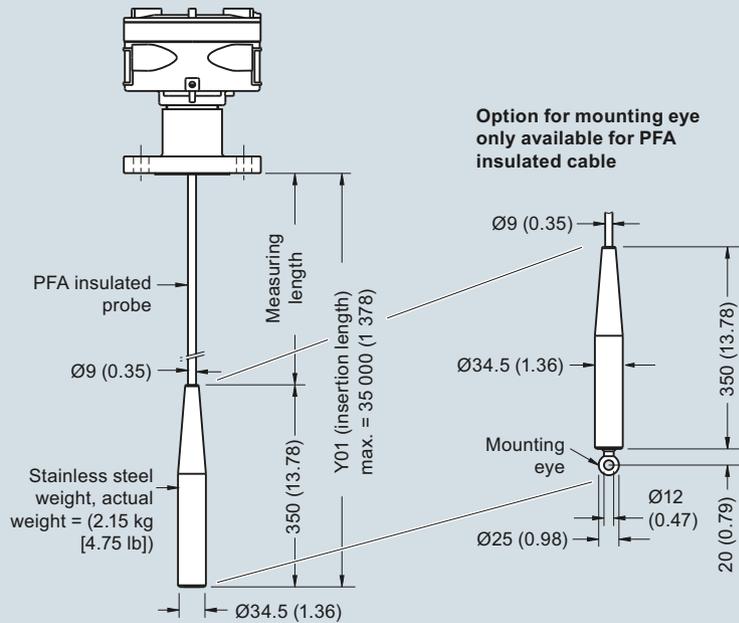

SITRANS LC500 cable versions, dimensions in mm (inch)

4

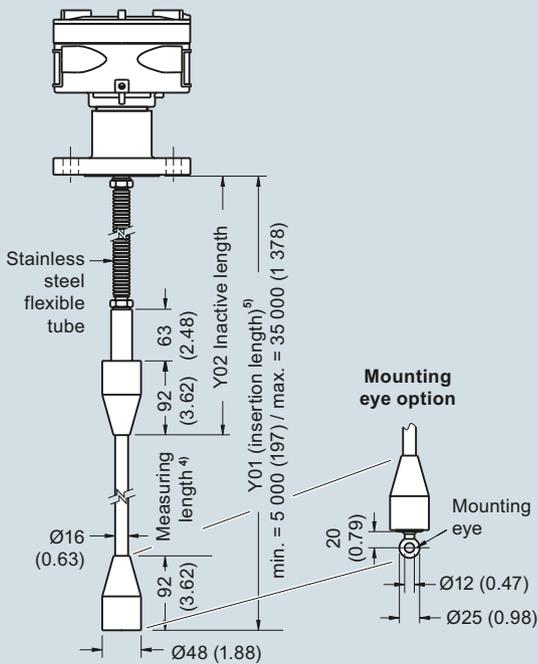

Cable version, non-insulated¹⁾
Welded flange (7ML5513)

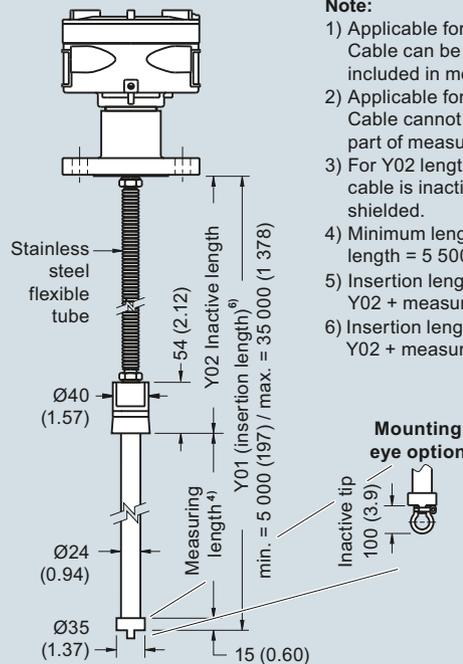

Cable version, insulated²⁾
Welded flange (7ML5513)

Extended cable version with rod sensor³⁾
Welded flange (7ML5523)

Extended cable version with rod sensor³⁾
Welded flange (7ML5523)

Note:

- 1) Applicable for non-conductive media only. Cable can be shortened on site. Weight is included in measuring length.
- 2) Applicable for both liquids and solids. Cable cannot be shortened. Weight is **not** part of measuring length.
- 3) For Y02 lengths greater than 5 000 (197), cable is inactive and is **not** actively shielded.
- 4) Minimum length = 200 (7.87), maximum length = 5 500 (216.54)
- 5) Insertion length Y01 = Y02 + measuring length + 92 (3.62)
- 6) Insertion length Y01 = Y02 + measuring length + 15 (0.59)

SITRANS LC500 cable versions, dimensions in mm (inch)

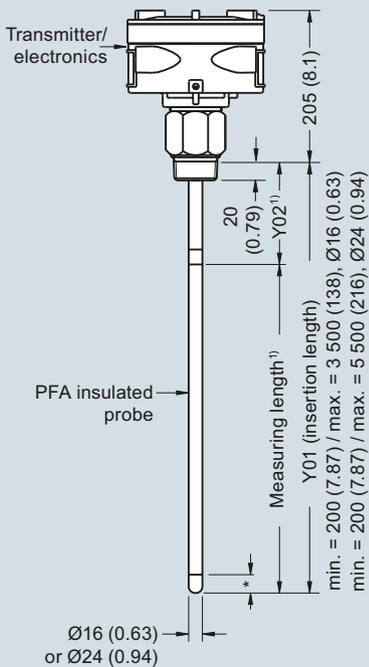

Level Measurement

Continuous level measurement - Capacitance transmitters

SITRANS LC500

4

Rod version threaded (7ML5515)

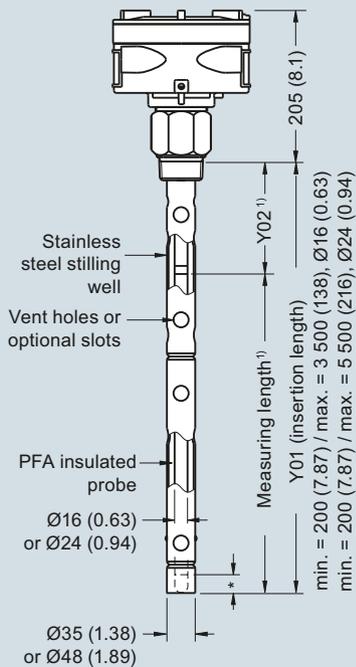

* = 30 (1.18) inactive tip

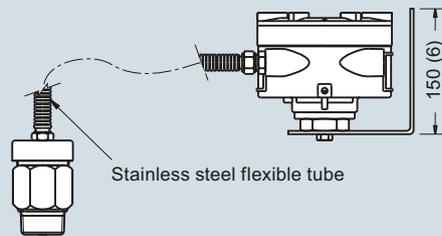

Note:

- 1) Minimum Y02 (active shield length) = 50 (1.96), minimum measuring length = 200 (7.87)

Rod version with stilling well threaded (7ML5515)

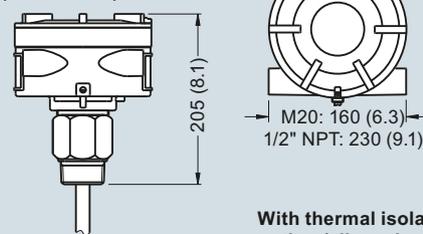

Remote electronics with mounting bracket option threaded (7ML5515)

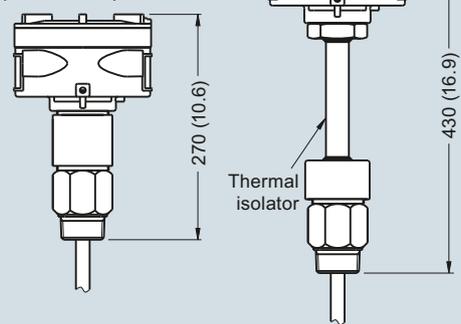

General purpose approval only.

Standard configuration (all versions)

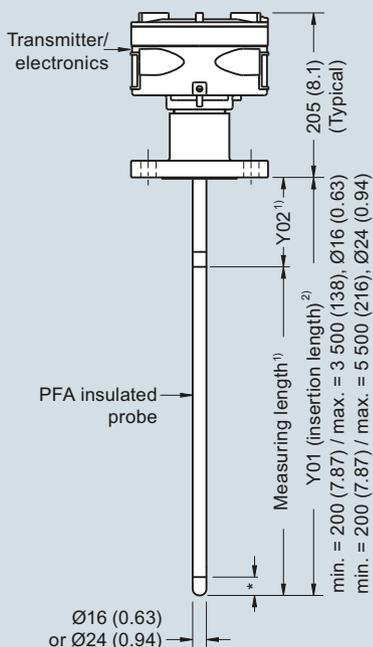

With thermal isolator option (all versions)

With explosion-proof seal option (all versions)

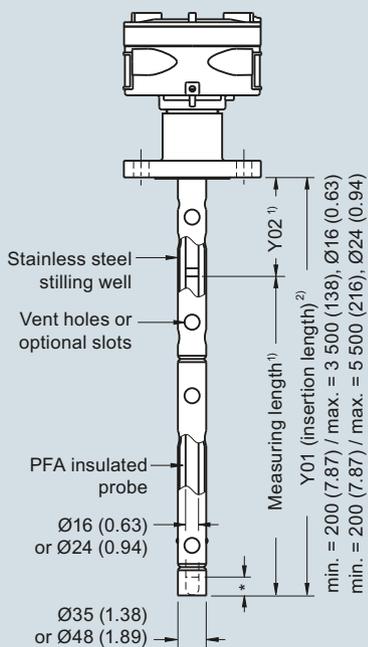

SITRANS LC500 rod versions, dimensions in mm (inch)

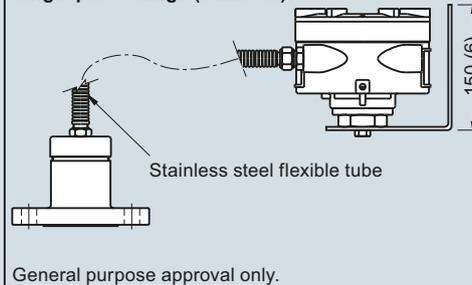

Rod version
Welded flange (7ML5515)
Single piece flange (7ML5517)

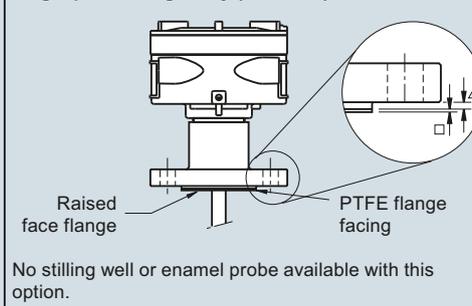

Rod version with stilling well
Welded flange (7ML5515)
Single piece flange (7ML5517)

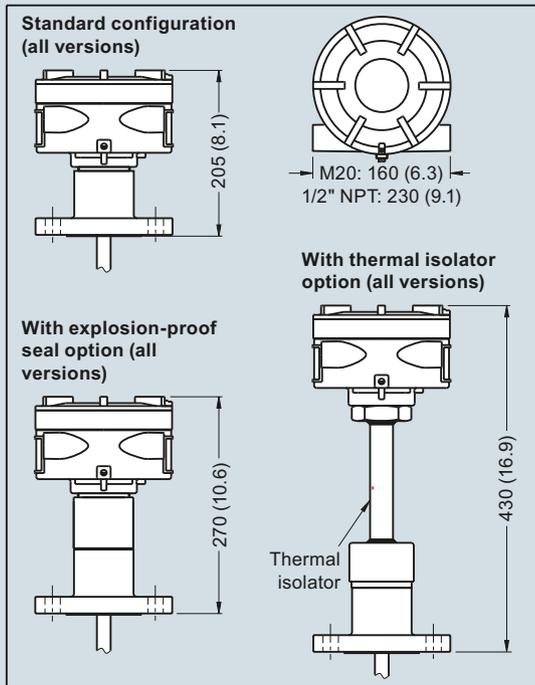

Remote electronics with mounting bracket option
Welded flange (7ML5515)
Single piece flange (7ML5517)

PTFE flange facing option
single piece flange only (7ML5517)

* = 30 (1.18) inactive tip

Flange facing (raised face)	
Flange class	Facing thickness
△ ASME 150/300	2 (0.08)
△ ASME 600/900	7 (0.28)
△ PN16/25/40/64	2 (0.08)
□ PTFE facing (additional)	2 (0.08)

Notes:

- 1) Minimum Y02 (active shield length) = 50 (1.96), minimum measuring length = 200 (7.87)
- 2) Insertion length does not include any raised face/gasket face dimension (see Flange Facing table above).
